

1

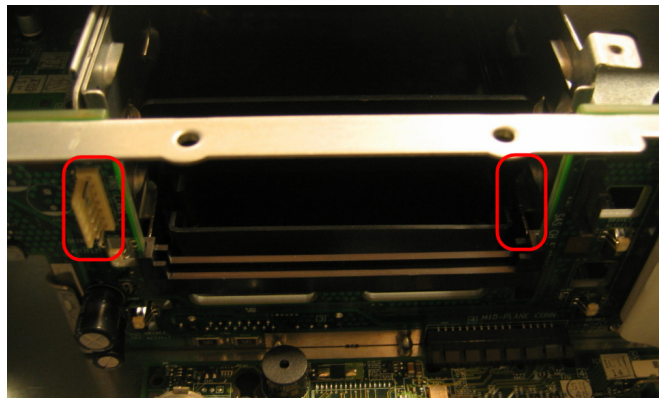

In the package there are three components:

- Single drive backplane
- SATA cable
- Power cable

2

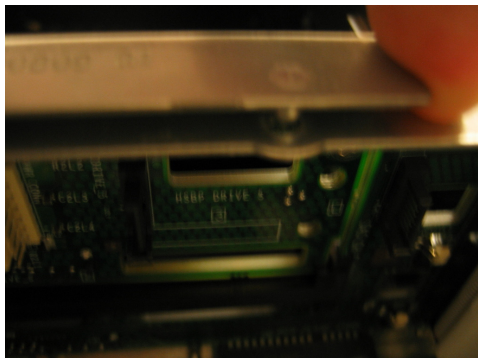

Identify the power and the sata connectors on the R720 backplane.

46.R72SA.001

3

Plug in the card into the main backplane by taking care of the holes positions.

4

Attach the SATA and power connectors with the two cable present in the box as shown in the pictures. The system is now ready for the 6th HDD.
